EnviroBasin™ & LittaTrap™ Comparison Guide

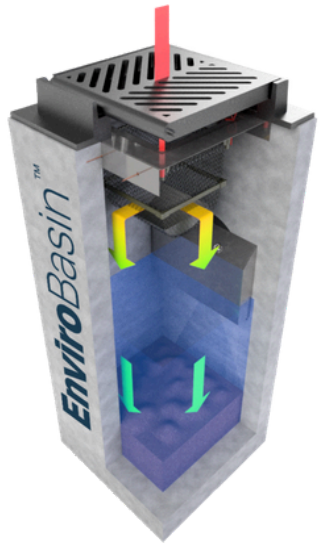

EnviroBasin™ & LittaTrap™ Comparison Guide

ENVIROPOD™

Quick Guide

Choose EnviroBasin™ when:

- Seeking an OGS-equivalent alternative
- Installing new catch basins
- Incorporating treatment into new infrastructure
- Looking for a compact, integrated water quality inlet
- When the site has a low hydraulic grade or high water table
- Needing treatment that fits a small footprint
- Multiple pipe networks are part of the design
- TAPE or ETV certified pretreatment is required
- Providing sediment capture in an existing manhole
- Targeting litter, phosphorous, plastics, gross pollutants, hydrocarbons and sediment

ISO 14034
ETV Certified - Canada

Choose LittaTrap® when:

- Retrofitting most existing catch basins
- Needing trash capture compliance
- Targeting litter, phosphorus, plastics, and gross pollutant removal
- Wanting a low-cost upgrade without major civil works

One-Line Comparison:

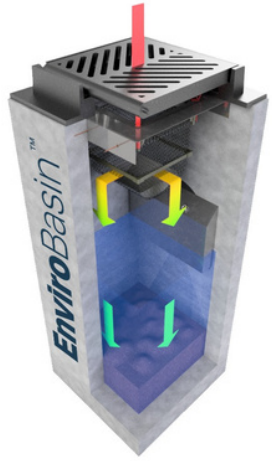

EnviroBasin™ integrates certified OGS-equivalent stormwater treatment into the footprint of a catch basin, while LittaTrap™ retrofits existing catch basins to capture litter, phosphorus, plastics, and debris at the source.

ENVIROBASIN™ VS LITTATRAP®

ENVIROPOD™

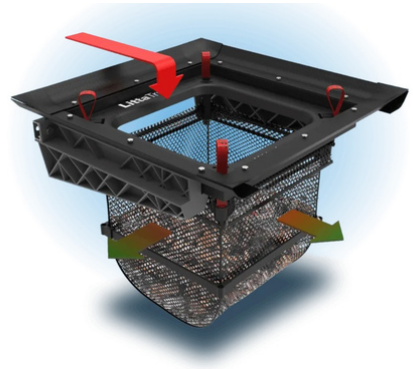

FEATURE	ENVIROBASIN™ INTEGRATED CATCH BASIN	LITTATRAP® CATCH BASIN INSERT
PRODUCT TYPE	Integrated water quality catch basin	Catch basin insert filter
IDEAL APPLICATION	New developments and capital works projects	Retrofit projects and existing catch basins
INSTALLATION	Installed as a complete catch basin structure	Installed inside existing catch basins
PRIMARY BENEFIT	Combines stormwater inlet and treatment into one asset	Quick, cost-effective upgrade of existing infrastructure
PERFORMANCE	**ETV-verified OGS-equivalent performance** with distributed, at-source treatment. Washington Department of Ecology TAPE CULD certification	**Designed to capture litter, phosphorus, sediment, debris, plastics, and other gross pollutants conveyed in stormwater runoff**, helping meet water quality objectives and regulatory requirements
RETROFIT FRIENDLY	Limited to catch basin replacement projects; EnviroBasin™ Air can retrofit into manholes only as a complete unit	Designed specifically for retrofits
FULL TRASH CAPTURE	✓	✓
LITTER & DEBRIS REMOVAL	✓	✓
SEDIMENT CAPTURE	✓	✓ Performance liner required for effective capture
PHOSPHORUS REDUCTION	✓ Through gross pollutant capture and treatment processes; reduction credits available through gross pollutant capture	✓ Proven phosphorus capture and approved phosphorus reduction credits in select jurisdictions
HYDROCARBON CAPTURE	✓ With PodBox Outlet Baffle and LavaSorb™	✓ With LavaSorb™
MICROPLASTIC CAPTURE	✓ With performance liner	✓ With performance liner
CONSTRUCTION SEDIMENT CONTROL	✓ With performance liner	✓ With performance liner
LOW IMPACT DEVELOPMENT (LID) PRE-TREATMENT	✓ Ideal solution, TAPE CULD certification for pretreatment	✓ Suitable for removal of large, high volume objects
MUNICIPAL RETROFIT PROGRAMS	✓ EnviroBasin™ Air	✓ Primary solution
NEW SUBDIVISION DEVELOPMENTS	✓ Primary solution	Suitable as pre-treatment
INDUSTRIAL SITES & YARDS SPACE-	✓ New infrastructure projects	✓ Existing infrastructure upgrades
CONSTRAINED SITES	✓ Compact integrated design	✓ Utilizes existing footprint
MAINTENANCE ACCESS	Surface-level access. Hand maintenance for basket, extended maintenance for sump	Surface-level access by hand
BEST FOR	**New catch basin installations** where treatment is integrated into the design from day one	**Existing catch basins** requiring a simple, high-performance retrofit solution

ENVIROBASIN™

New catch basin installations
Treatmentintegratedintothedesignfrom day one.

LITTATRAP®

Existing catch basins
A simple,high-performanceretrofitsolution.

NEW BUILDS
EnviroBasin™: treatment integratedfromday one

RETROFITS
LittaTrap®:installed inside existing catch basins

FULL TRASH CAPTURE
Both EnviroBasin™ and LittaTrap®

SURFACE-LEVEL ACCESS
Both solutions, serviced from the surface

Supported Conditional Information

ENVIROPOD.COM

Free Design support & regulatory assistance

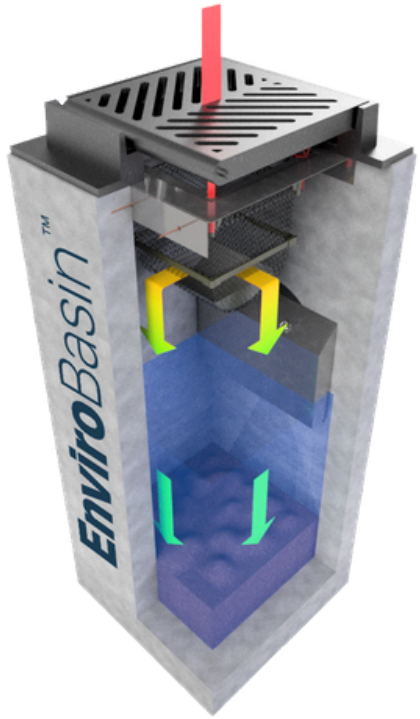

EnviroPod™ offers a free design service where the cumulative performance of several EnviroBasin's™ can be modeled for a specific project based on local rainfall and treatment needs. Using local rainfall data and treatment requirements, this service helps stormwater consultants optimize the placement, quantity, and sizing of EnviroBasin's™ for maximum efficiency.
